1. The following is an examiner's statement of reasons for allowance: The prior art reference to Fedynshyn (6,468,712 B1) is noted to be directed to compositions used in resists treated with lasers having wavelengths as claimed, where the composition has an acid generator and the "-OP" or "protected hydroxyl" groups discussed on col. 3 and 8, appear to be equivalent to the claimed "blocked acid groups, however while this examiner is not an organic chemist, let alone a polymer chemist, there do not appear to be any suggestions to employ the claimed fluorinated dienes as Fedynshyn's aliphatic polymer. Electron withdrawing groups are suggested to be halogen (col.3) or F, to increase the acidity of the hydroxyl proton (col.9), but the structures they are attached to appear to be saturated linear groups (col.9) or halogenated benzene (col.8), which do not suggest fluorinated dienes to this examiner.

Applicants' request to examine claims 6-9 on p.7 of their 6/22/04 response is mute, since they were already under examination.

With respect to co-pending application 10/637,504, it is noted that the claims are directed to a compound inclusive of ones that may be used in the present compositions, and a process for making that compound that is employed when making such a component of the presently claimed composition. However as this fluoropolymer compound & the process of making it were not claimed separately in the present case, and could be considered different statutory classes, i.e. the composition may be a product made from the compound, and restrictable if in the same case, because the compound could be used in different compositions not requiring limitations discussed by applicant on page 7 of their remarks, the obviousness double patenting rejection is withdrawn.

Applicants' discussion on p.6 of their remarks, citing p.6, lines 23-24 of the specification, sufficiently clarifies the intent of "single bond" as an R group in claim2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
